Make A Choice That Lasts

Professionally
Installed in one step,
Duradek is ready
for immediate use on

Sundecks,
Roofdecks,
Balconies,
Patios,
Stairs,
Pool Decks,
Walkways,
and more.

Company Story

Since 1974, Duradek® has been supplying North America's premier sheet vinyl pedestrian traffic membrane. Along with other PVC products, such as siding, windows and industrial roofing, Duradek® vinyl has gained wide acceptance in the construction industry as the ultimate in maintenance-free outdoor flooring.

With a brand name that has become synonymous with 'vinyl decking', Duradek®'s factory engineered products and professional, detailed installation techniques have set the standards for waterproofing that works.

All Duradek® membranes are reinforced for multi-directional strength and stability, and have a textured finish for slip-resistance. To increase performance, the vinyl makeup includes mildew inhibitors along with ultra-violet and heat stabilizers. Attractive patterns, colours and textures provide a contemporary new look, previously unavailable in the outdoor waterproof flooring market.

Duradek® is continually researching, developing & testing new products and application techniques.

Product Story

Duradek®, The ORIGINAL sheet vinyl membrane system for waterproofing decks and balconies, was developed to solve leak problems over 40 years ago.

How Duradek® is Better

- **Duradek® is a pre-manufactured sheet, installed in one step — ready for immediate use. It can even be walked on during the installation process.**
- **Duradek® can be successfully installed in almost any weather condition.**
- **Duradek® adheres to a variety of surfaces, even over cracks, with minimal surface preparation.**
- **Duradek® requires no regular maintenance except cleaning.**
- **Duradek® is textured to provide slip-resistant, safe-footing.**
- **Duradek® is completely waterproof and attractive.**
- **Duradek® has a long life expectancy and can be re-coated in the future.**
- **Duradek® is manufactured in North America.**

Trained Installers

Duradek® offers classroom and video training to waterproofing contractors.

The Duradek® Authorized Contractor receives training which is a combination of floor laying skills for appearance and single-ply roofing skills for water tightness. Thorough knowledge of adhesives, sealants, coatings, carpentry and concrete restoration work are common traits of a Duradek® contractor.

All necessary components of the finished waterproof system are available from Duradek®. This includes the adhesives, sealants, drains, scuppers and perimeter fastening devices.

All Duradek® products, when applied by an authorized Duradek® contractor, are covered by written warranties. Terms are dependant upon product thickness.

Duradek Permanently Waterproofs Decks and Balconies Better Than Any of the Alternatives

Commercial Waterproofing Solutions

The Duradek® System consists of a number of different types of sheet vinyl products, designed individually for many end uses.

The original Duradek®, a textured PVC, is laminated to a polyester reinforced fabric for additional strength and flexibility. Available in the industry's broadest selection of patterns and colours, Duradek® vinyl membranes offer a wide range of waterproofing solutions in both residential and commercial construction.

Heavy duty, vinyl membranes are perfect for use on roof decks and balconies.

Constructed of 60 mils of PVC, Duradek® Ultra is designed to accept heavy pedestrian traffic and withstand extreme temperatures and ultra-violet conditions. It is also fire-retardant and resistant to most chemicals and mould.

Residential Waterproofing Solutions

The Duradek® System is unique in its variety of patterns, colours and range of applications.

Duradek®'s durable, textured materials offer excellent slip-resistance for safe footing. With a long life expectancy and low-maintenance surface, Duradek vinyls stand up to all North American climates and can be reliably used on decks over living space, maximizing square footage of useable space.

Contemporary new colours and patterns allow outdoor living space to be styled with contrasting borders, unique combinations or custom design work.

Duradek® vinyl surfaces also work very well for interior applications. Indoor pool decks, hot tub areas and even garage floors are enhanced by Duradek®'s waterproof, easy-to-clean surfaces.

Powder Coated Aluminum Railing System

Quality You Can Lean On

Durarail™ is engineered to last!

When choosing a railing system, structural integrity is important. So is an attractive, low-maintenance finish. Durarail™ railing systems offer the best of both worlds with a range of products that are designed to meet the requirements of the most current building codes and are engineered to exceed the most stringent requirements like hurricane force winds and extreme temperatures.

Durable aluminum railings with a VOC-free powder-coated finish are the perfect complement to Duradek vinyl decking for environmentally-friendly outdoor living space. With over 200 finish options in a range of custom colours or the authentic looking woodgrain finish, Durarail™ can personalize your outdoor design details to give you quality space you can enjoy and the performance you can trust.

Durarail™ – railing systems that look great and are designed to last.

Durarail™ meets the International Building Code (IBC) 2006 in the USA and the National Building Code of Canada (NBC) 2005.

Durarail is manufactured by Excell Railing Systems Ltd. It is sold exclusively through the Duradek network of professional waterproof contractors who have been specializing in decks and rails since 1974.
