# Standard Picket and Glass

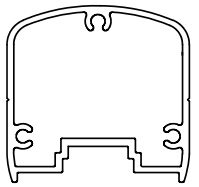

Standard Square Top Rail

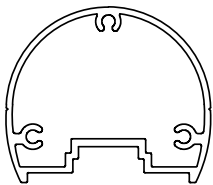

Standard Round Top Rail

Excell Heritage Top Rail

Excell Square Top Rail

Excell Round Top Rail

Whether it's newly constructed or remodelled, backyard or highrise, painting and maintaining railings and fences is now a thing of the past!

# Clean Look – Simple Beauty

Durarail™ Rail and Fence Systems are available in 9 standard colors.

white

oyster grey

beige

sandalwood

rideau brown

evergreen

grey

black

textured black

Colors may not be an exact representation, please check color chips for exact color.

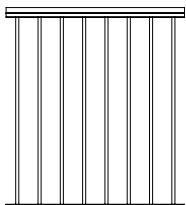

The genius in the Durarail™ System is in its simplicity. Everything snaps on or fits together with minimum on-site work and few exposed fasteners.

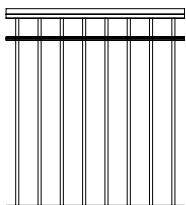

Choose from one of 180 custom colors than can be produced to match any exterior design features.

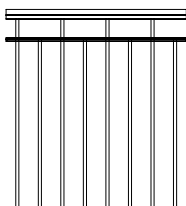

# Attention to detail — from start to finish

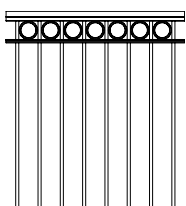

Panel Style 1

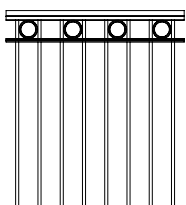

Panel Style 2

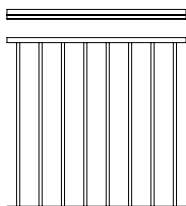

Panel Style 3

Panel Style 4

Panel Style 5

Panel Style 6

All Durarail™ components are precision fabricated and go through a tough, multi-level quality assurance program to ensure the highest standards.

# Customized by Design

*No matter the shape, size or style, Durarail™ can be customized for any project.*

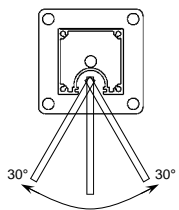

Whether it's custom pickets or posts, the authentic-looking wood grain finish for top rails, or the contemporary look of a cable railing system; Durarail™ can give any project its own unique look.

# Custom Glass Systems

Durarail™ Glass Railing Systems offer a variety of view-through options with three styles of custom posts in both surface mounted and fascia mounted designs.

The round glass track of the Panorama Post adjusts 30° in both directions to achieve multiple angles.

# Powder Coating Specifications

Powder Coating is an advanced method of applying a decorative and protective finish to a wide range of materials and products that are used by both industry and consumers. It is used on many metal items that are exposed to the weather. As a finish, it is the best way to ensure durability, weather resistance and color retention.

Durarail's Powder Coating facility meets the American Architectural Manufacturers Association (AAMA) performance requirements for the long term durability of organic coatings on Aluminum extrusions and panels used in high quality aluminum windows, doors, and railings.

The Durarail™ process is a four stage cabinet style (spray nozzle) alkaline system.

Railing components are cleaned with an alkaline solution that is designed for cleansing the substrate of mixed metals, oils and contaminants prior to powder coating.

An additional seal coat is then added to the Durarail™ powder coating process. This seal coat process is a chrome-free, non-phosphate liquid coating chemical used on Aluminum and Zinc alloys. A clear, nearly colorless chemical is applied and dried in place.

This coating has excellent paint bonding properties and adds additional substrate protection.

**Powder Coating** is an advanced method of applying a decorative, durable and protective finish.

Nowhere else are the benefits of architectural powder coating more evident than on the thousands of commercial, industrial, government, residential, historic and institutional buildings from around the world.

For 30 years, powder coating has been the finish of choice for a superior, more colorful, longer-lasting and more durable finish.

Durarail™ is specified because of its durability, scratch-resistance, gloss retention, weatherability, and resistance to chalking.

The unlimited range of colors, finishes, glosses and textures make Durarail™ the right choice for your next project.

## Durarail™ — Engineered to Last!

Consider aluminum's many uses in today's world. For decades aluminum has provided dependable service in windows and siding in the building industry. Its strength and non-corrosive qualities also make it the perfect choice for vehicle chassis, engine blocks and the most demanding of all - the aeronautics industry. This Durarail™ aluminum rail system will still be performing long after many of the other building materials have been replaced. Durarail™ is engineered to current IBC and National Building codes.

Unlike wood or wrought iron, Durarail™ Aluminum Railings and Fencing will not rust, rot, peel or need repainting.

**Rusted steel handrail**

**Rotting, splintering wood rail**

**Rusted wrought iron**

**Durarail™ meets AAMA 2603 and 2604 specifications.**  
*Upon request, powder coating can be upgraded to meet AAMA 2605 specifications.*

# Who We Are...

Durarail™ is manufactured by  
**Excell Railing Systems Ltd.**  
It is sold exclusively through the  
Duradek network of professional  
waterproof contractors who  
have been specializing in  
decks and rails since 1974.

Durarail™ is your natural  
choice for Residential and  
Multi-Residential aluminum  
railing requirements.

**Manufactured in  
North America**

## Durarail™ Warranty

*The Durarail™ residential aluminum railing system  
will be free from defects in the structure for twenty (20) years and the Durarail™ powder coated finish  
will not crack, peel, flake or blister for a period of ten (10) years.*

*Multi-Residential warranties are project-specific and are available for both standard  
and custom applications.*

*Warranties are one (1) year, consult your  
Durarail™ representative for further details on terms and conditions.*
