

Case History #176

Project: Donate-A-Deck Winner; Abbotsford, BC

Date: September 2017

NORTH AMERICA'S PREMIER WATERPROOF VINYL FLOORING SYSTEM SINCE 1974.

The Problem

When Jennie and James first moved into their home, the wooden deck stairs were rotten. James, unable to do the work due to a back injury guided Jennie through the building of a new staircase step by step. A few years later, their deck was also in disrepair due to wood rot.

Their 4 children all have special needs. Their deck is an essential area of the home, as it's usually the furthest outdoors of the house they are comfortable to venture.

They dreamed of extending their deck by a few feet when they could replace the rotting wood. They knew that DIY-ing their deck was a huge undertaking of time and money they did not have. However, not dealing with the water damage could lead to more costly repairs down the road.

Then they discovered Donate-A-Deck.

The Duradek Solution

They saw Duradek's *Donate-A-Deck* contest in Summer 2017, and decided to nominate themselves... and won!

To create a safe outdoor area for the family, *Duradek Canada* removed the rotten wood and replaced it with fresh un-treated plywood.

James and Jennie picked **Duradek Ultra Heritage Agate** to complement their existing exterior colors. New **Durarail Aluminum Picket Railings** were added in a similar style to their old railings to keep their deck a safe, familiar space for the family to enjoy.

With their new low maintenance deck, Jennie and James can comfortably hold special needs youth social nights and entertain company on their deck with confidence—and without the need to ever worry about the time and cost of waterproofing maintenance.
