

Case History #186

Project: Worst to First Deck Makeover; North Vancouver, BC
Date: June 2019

NORTH AMERICA'S PREMIER WATERPROOF VINYL FLOORING SYSTEM SINCE 1974.

The Problem

The homeowner's above-garage deck had fallen into disarray. The surface coating was old and in such poor condition it was nearly impossible to clean.

The aged coating was at risk of allowing water to leak into the garage below which could lead to costly water damage repairs.

The homeowners wanted outdoor space for entertaining but felt their existing deck was wasted square footage because of the maintenance involved to make it presentable.

The *HGTV Worst to First* team called on Duradek to provide an attractive, low maintenance waterproofing deck surface.

Duradek waterproof vinyl would protect the garage below from leaks while providing low-maintenance outdoor flooring in a single product solution.

The Duradek Solution

After the previous coating was removed, the deck was re-sheeted with fresh, untreated plywood in preparation for the professional vinyl installation.

Duradek Legacy Cedarwood was chosen for the deck revamp. With built-in mold and UV inhibitors and a 5-year Appearance Warranty, Duradek gave the homeowners the attractive outdoor living space they always wanted.

A combination of fascia-mounted and pedestalled surface mounted *Topless Glass Railings* from **Durarail** were included to complete the new outdoor living space. (See [Case History #185](#) for details)

Upon the unveiling of their *Worst to First* renovations, the homeowners were thrilled with their new low-maintenance outdoor living space — perfect for hosting company.

JOB NOTES

Not only was the HGTV Team able to give these homeowners their dream deck, but by choosing Duradek and Durarail together, the homeowners have a single source for their deck and railing warranties.
