

DURADEK™ + DURARAIL™ = SINGLE SOURCE FOR WARRANTY PROTECTION

SUNDECKS | ROOF DECKS | BALCONIES | PATIOS | STAIRS | POOL DECKS | WALKWAYS

You don't let your dentist work on your eyes, a plumber fix your car or the butcher install your Duradek... So, why allow the railings on your waterproof outdoor living space to be installed by someone who is not a qualified waterproofing contractor?

To protect the integrity of your new waterproof vinyl outdoor living space, you need to consider how the railings will be installed. Railings that are incorrectly installed can result in major water damage causing mold, rot, and deterioration that can be very expensive to repair.

DISCOVER THE DURADEK™ + DURARAIL™ DIFFERENCE

When completing your outdoor living space, having your Duradek authorized applicator attach the railings ensures a successful waterproof installation. There are several mounting options that will ensure complete, long-term waterproofing as well as nearly limitless railing styles to choose from.

RAILING MOUNT OPTIONS

BEST OPTION - FASCIA MOUNTED

- Attaches to the side of the deck, maximizing deck surface area.
- The deck membrane is not penetrated by hardware, keeping it water-tight.

NEXT BEST OPTION - SURFACE MOUNTED WITH RAISED BASE PLATES

- Pedestals are covered in the same vinyl as the rest of the deck surface so they blend in and provide extra clearance underneath the railing for easy cleaning.
- Water cannot settle where screws secure into posts – a point of waterproofing vulnerability.

GOOD OPTION - SURFACE MOUNTED WITH CAULKED SCREWS

- Screw chases are filled with caulking to seal points of waterproofing vulnerability.
- Least expensive option but requires regular yearly inspection of the caulking to ensure it is still intact and waterproofing that point of entry.

SINGLE-SOURCE WARRANTY SOLUTION

With Duradek + Durarail, you gain the benefit of a **Single-Source for Warranty Protection**: Coverage for the entire outdoor living space from one, rather than multiple, warranty sources. This also eliminates the possibility of a different railing contractor compromising the waterproofing integrity of your Duradek vinyl deck or having multiple contractors blaming each other should there be a failure.

Protect your investment by having your Authorized Duradek applicator complete your Duradek outdoor living space with Durarail railings.
