

SUNDECKS | ROOF DECKS | BALCONIES | PATIOS | STAIRS | POOL DECKS | WALKWAYS

Luxurious glass railings with exceptional design for unobstructed views.

The innovative PUP Post with complete design flexibility allows a single post to function as an in-line, corner or end post. With multiple angles, heights, and in-fills, our topless glass system offers complete versatility.

A single, multi-functional post... Nearly limitless options!

- **Post position:** A revolutionary single, multi-functional post with a triple-channel design enables a single post to function as either an in-line, corner or end post.
- **Angle options:** Multi-function insert component allows for a 60° angle variance so you can adjust to the shape to virtually any space. Even if you need to “bend” your glass around a corner.
- **Mounting style:** Traditional surface mount or fascia mount.
- **Glass options:** Clear panels for view-through railings, frosted for privacy, or any combination of both.
- **Height options:** Whether you want your glass at post height or extended height to provide a wind or privacy screen; PUP Post allows you to adjust the position of where the glass sits, for custom projects and a standard 3” gap from deck to glass allows for easy cleaning.
- **Virtually maintenance free:** No rust or corrosion.

Shape, size, or style versatility... PUP Post provides it

The unique PUP Post offers exceptional design flexibility:

- Windscreen to provide wind protection.
- For privacy, pair with [Wood Grain Aluminum Panels](#).
- For a continuous top rail, add the [Port Royal Top Rail](#).
- 60° angle variance so you can 'bend' or adjust to the shape of virtually any space.
