

WATERPROOFING FOR EXTERIOR TILE ASSEMBLIES

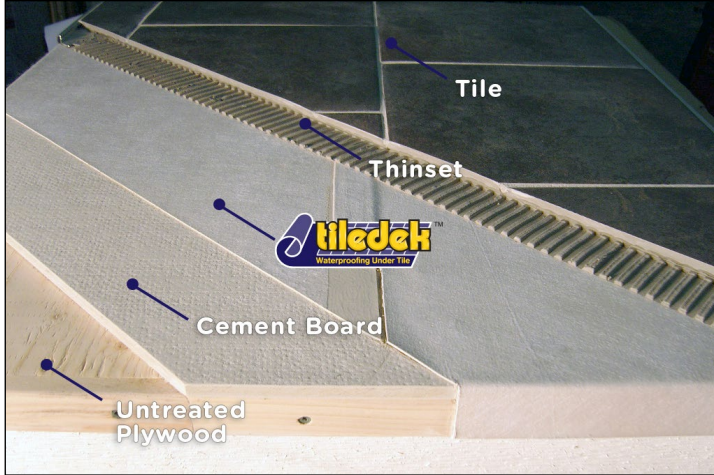

SUNDECKS | ROOF DECKS | BALCONIES | PATIOS | STAIRS | POOL DECKS | WALKWAYS

Reliable Waterproofing for Exterior Tiled Decks and Roof Decks Duradek's Tiledek™ System

Duradek's Tiledek waterproof underlayment is made specifically for exterior tiled deck and roof deck applications. It is constructed with a geotextile fabric surface that provides excellent adhesion of thin-set mortar in the application of tile.

The Tiledek membrane has Duradek's proven waterproof performance and meets building code as a roofing compliant membrane. Tiledek is the perfect solution for tiled roof decks situated over living space or where you need to keep it dry below.

Tiledek Waterproof Underlayment Provides:

- A unique waterproofing solution made specifically for exterior tiled deck projects
- A building code approved roofing membrane made for decking applications.
- Professional installation by contractors trained in roof deck waterproofing.

It is the Appropriate Alternative to:

- EPDM/Rubber Roofing
- Torch Applied Roofing
- Under Deck (Dry Below) Systems
- Liquid Waterproofing Systems

Designed as the Ultimate Waterproofing Solution for Exterior Tiled Assemblies.

Excellent elasticity/elongation means Tiledek can withstand the effects of freeze/thaw cycles. No matter what shifting or cracking happens with the surface tiles or grout, no water will get through to the structure below.
