

Walkable Waterproof Deck & Roof Membranes

Yes, Vinyl IS Green

When Building Green, Duradek vinyl is an excellent product choice for your decking and flat roof needs. Aside from having no Deck or Roof (which uses NO products, consumes NO energy, and creates NO landfill waste or need to recycle), Duradek is your GREEN choice for outdoor Waterproof Decking and Roofing.

Compare PVC to the Alternatives

When compared to products that perform the SAME function, consider the following:

PVC's one-step application and longevity compare favorably to the multiple application and reapplication requirements of liquid-applied systems, saving many trips to the job, which in turn consumes less energy.

There is a huge weight savings benefiting the structural requirements and the energy consumption to transport as compared to an EPDM membrane with concrete pavers.

When compared to pressure treated wood, there are no chemicals leaching into the environment and likely double the life expectancy.

As a waterproof roof or deck, [compared to alternatives](#).

DURADEK IS THE GREENER CHOICE!

Duradek Products Qualify for LEED points

YES, Duradek products can be considered for [LEED points](#):

Duradek's 'Cradle to Grave' Story

Years ago, being 'Green' meant a product was made of recycled materials or could be recycled. Now we understand that the entire 'Cradle to Grave' needs to be evaluated. Read Duradek's ['Cradle to Grave'](#) story.

Think Green – Think Sustainable – Think Ahead

Think Removable Trim Boards!

One of the main considerations for the sustainability of a walkable roof deck membrane system is how it will be replaced in the future.

Ease of replacement means there is less material waste and energy consumed when it comes time to repair or replace a decking system. By installing a removable trim board at the initial installation you do not have to disturb existing wall finishes.

Please see the Duradek drawing for [Detail IS-08 – Removable Trim Board Detail](#) on our CAD Drawings page. (<https://duradek.com/architectural-resources/vinyl-decking-resources/bim-cad-drawings>)

Compared to the alternatives, Duradek is your GREEN choice for Outdoor Waterproof Decking and Roofing!
