

Announcing the New Dek-Vision Deck Visualizer Tool by Duradek

A Free Online Tool for Creating Virtual Deck Designs to Engage the Planning Process

Surrey, BC, April 12, 2018: Duradek™ is excited to introduce *Dek-Vision*, the first online design tool to assist homeowners, Builders and Remodelers create deck makeover plans with Duradek vinyl waterproof membranes. This new visualizer is now available on the Duradek website (www.duradek.com).

Dek-Vision is free to use and comes pre-loaded with 8 deck image options that cover a variety of the most common deck types. *Dek-Vision* allows users to experiment with the deck surface, the railing color, and even the siding to find the look that's just right for individual tastes.

Users also have the ability to upload a photo of their own deck and try out all of the options of Duradek vinyl deck patterns and colors to discover which ones will best match their exterior design. With a graph tool and a paint tool, users can have their own deck image uploaded and set up as a template in a matter of minutes.

Dek-Vision is equipped with the complete color selection of Duradek vinyl deck membranes. With 27 color options in 10 different patterns, Duradek has the best selection in the vinyl decking industry. With so many great options to choose from, selecting the right vinyl for a deck is **a challenge that was just made easier!**

Railings are an important part of a deck makeover project and *Dek-Vision* allows users to experiment with all 9 standard colors offered by Durarail™ railings. The railing and siding features are limited to the pre-loaded deck images, which will provide a great example of how those exterior colors will blend together in thousands of combinations.

Duradek invites users to share their virtual deck images. Please tag us on Facebook or Instagram (@Duradek) or Tweet @Duradekspert with the hashtag #DoltWithDuradek.

Waterproofing Solutions Since 1974.

Duradek was created to solve difficult waterproofing problems over 40 years ago and it is still one of the most reliable methods for long lasting, low maintenance waterproof decks and roof decks available on the market today.
