Introducing

A Revolutionary New Railing System! PUP Topless Glass System

**Meet the next generation of Topless Glass Railing Systems,
the PUP...**

This "new generation" of topless glass railing systems is born with the creation of the **PUP**; - a 2 ½" x 2 ½" post with the same great look and function as the original *Panorama Post* system, but utilizing a Single, Multi Functional Post! The new, triple-channel design enables a single post to function as either an inline, corner or end post.

The multi-function insert component provides the ultimate versatility for custom projects allowing you to adjust your glass height and angles (up to a 60 degree variance) for a nearly limitless range of options for your outdoor designs.

Whether you want the topless glass railing system for a view deck, as a wind wall or a privacy screen, the PUP can provide a sophisticated look for a wide range of design options. You even have the option of adding a top rail to the system (The [XLPR Top Rail](#)) but keep the bottomless railing look for your view, and the standard 3" gap from glass to deck allows for easy cleaning and snow removal.

PUP Offers...

- 30 degree multi angles possible (up to 60 degree variance)
- Can be Surface or Fascia mounted
- Option of adding top rail cap (XLPR Top Rail)
- Available in 9 standard colours and up to 180 custom colours
- Multiple design options
- Accommodates unique shapes and custom designs like curves and unusual angles
- Design option of different glass types or alternate material options for a louver look.
- Add a top rail to the system and create a bottomless railing look for your view
- Gap from deck to glass allows for easy cleaning and snow removal
- Ideal for wind wall applications
- Privacy screen options possible
- Fencing options possible

*PUP provides the power of possibility
for designing outdoor living space.*
