# New PARK RAIL Top Rail Provides a Look as Strong as its Performance

## Park Rail Top Rail Dimensions:

3 1/2" wide | 2" high

## Park Rail Top Rail

one top rail—any picket size

*Introducing the Park Rail Top Rail Profile, a Sophisticated Top Rail for Plenty of Support.*

Now you can have a Continuous Top Rail look while using up to a 3" square post!

*Park Rail Top Rail* is suitable for both picket and glass systems allowing your project to combine the features and advantages of both systems, yet still providing a consistent look throughout.

The new *Park Rail Top Rail* profile has a much wider, beefier look than the average aluminum top rail profile. It is similar in appearance to what you've come to recognize as 2 x 4 (wood) size; but this top rail is not vulnerable to the elements the same way as wood.

It is constructed of durable powder-coated aluminum and is made to last without the need for maintenance.

The *Park Rail Top Rail* profile is available in 9 standard colors, up to 180 custom colors, or one of 22 authentic looking wood grain finishes.

*The Park Rail Top Rail profile from Durarail is manufactured by Excell Railing Systems Ltd.*

## Designer and Manufacturer of Innovative, Maintenance Free Aluminum Railing Systems like the authentic looking custom **Wood Grain Finish.**

**EXCELL**  
RAILING SYSTEMS LTD.
