

*** For Immediate Release ***

September 7, 2016

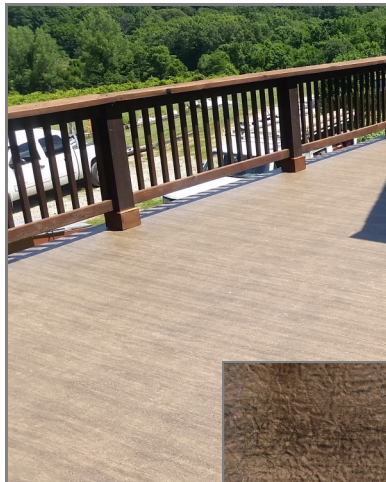

The Legacy Continues with Desert Quartz.

Duradek is proud to announce the release of '**Desert Quartz**' - a 4th colour in the well-received "**Legacy**" line of designer 60 mil vinyl membranes that emulates the look of natural surfaces with the low-maintenance durability of waterproof vinyl. Its lighter base offers reflective qualities while a cleverly designed speckle pattern adds depth and style; as well as an effective background to camouflage light organic sediment that can accumulate on an exposed deck surface.

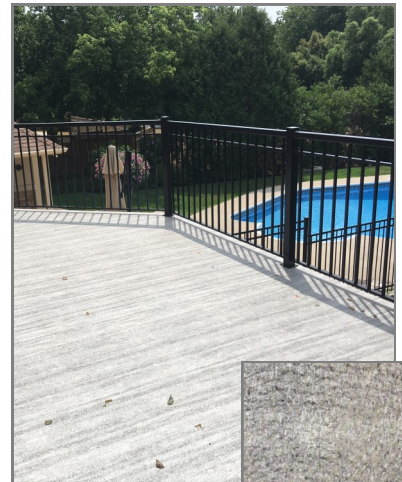

Duradek Ultra Legacy Pebble Beach

Pebble Beach brings a remarkable aggregate pebble appearance to outdoor spaces in a simple, one-step application.

Duradek Ultra Legacy Barnwood

Barnwood's warm, traditional wood grain appearance is resistant to the elements.

Duradek Ultra Legacy Driftwood

Driftwood's sun-aged faux wood look will keep your deck protected without ongoing maintenance.

Duradek Ultra Legacy—Inspired by Nature...Designed to Withstand It

Duradek was created to solve difficult waterproofing problems over 40 years ago and it is still one of the most reliable methods for long-lasting, low-maintenance waterproof decks and roof decks available on the market today.

Actual colour under natural light may appear slightly different than it appears on this document.
